

JEENOR[®]
杭州洁诺清洁用品有限公司
HANGZHOU JEENOR CLEANING SUPPLIES CO.,LTD

COMPANY BRIEF

Hangzhou Jeenor Cleaning Supplies Co., Ltd. is a leader in the field of non-woven, industrial wiper and safety protection in China. We are devoted to the research and development of industrial wiper, safety protection and medical consumptive material.

Our product and service are delivered to over 500 thousand users in more than 20 countries and regions around the world. Our products are used in many fields such as aviation, military, electronics, traffic equipment manufacturing, medical system etc. In the industrial wiper field, our products include cleanroom wiper, workshop wiper and special wiper. With strict quality control, professional service and excellent technical support, we help the customers keep a safer, more efficient and healthier working environment.

Jeenor is devoted to providing the customers with more professional products, more competitive price and more complete service. We are contributing to the global environmental protection with our action. This is our commitment.

DISPENSER

JEENOR[®]

The wiping product plays an irreplaceable role in our daily life and work. No matter improving the working efficiency or protecting the working environment, our wiping products can completely meet your needs. The patented manufacture process ensures the products have excellent cleaning performance and durability. With good feeling, low lint, unique pattern, customized size and special color, our products set up an example in the industry. All the wiping products comply with the relevant testing and certification.

The protective clothing is widely used in the industrial field. We can offer protective clothing solutions that meet various needs. The product's excellence and reliability are highly recognized by the users, such as fire resistance, heat resistance, comfortability, durability and anti-static etc. Such products meet corresponding testing and certification standards.

Issues In The Industrial Wiping

- Safety issues

Occupational safety

Individual safety (those harmful substances contained in the rag result in personal injury)

Environmental safety (dirty workshop environment and difficult-to-handle waste)
- Equipment safety

Potential safety hazard of the traditional rag and cotton yarn

Damage to the equipment (scratching or scuffing the equipment)

Nonconformity to the process requirements (no lint,anti-stactic, no harmful substances etc.)

Other hidden hazard (e.g. huge loss resulted from rag fragment falling into the engine...)
- Quality issues

Product quality

The traditional rag contains many contaminants that affect the object to be wiped

Unstable product quality and decreased efficiency
- Use effect

Failure to reach the expected effect (poor effect in decontamination, degrease and water Absorption)

Nonconformity to the process requirements (no lint,anti-stactic, no harmful substances etc.)

High time and power consumption
- Cost issues

Use cost: out of control

Hidden cost

"Large" warehouse

"Troublesome" pickup

"Orderless" distribution

"Much" waste
- Environmental issues

Product source

Most come from waste and unhealthy leftover bits and pieces

Those harmful substances (heavy metal, silicon etc.) bring potential safety hazard to people and equipment

Inhomogenous materials result in unguaranteed quality

Waste handling

hard to degrade

Common Wiping

Wipe products of different strength and materials with stable quality offer your wiping operation perfect solution.

PONGEL® L15 Economical Industrial Paper Wiper

Features:

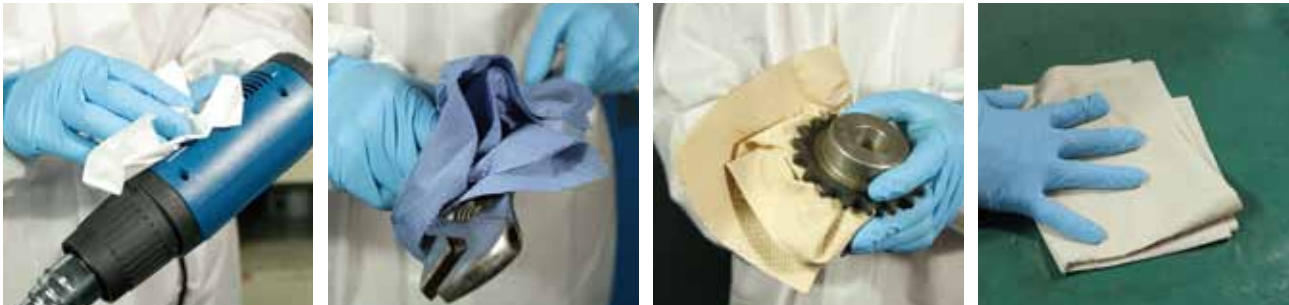

- High water and oil absorbency.
- Hygeian and safe due to disposable use.
- Recycled pulp, economical and environment-friendly.

Applications:

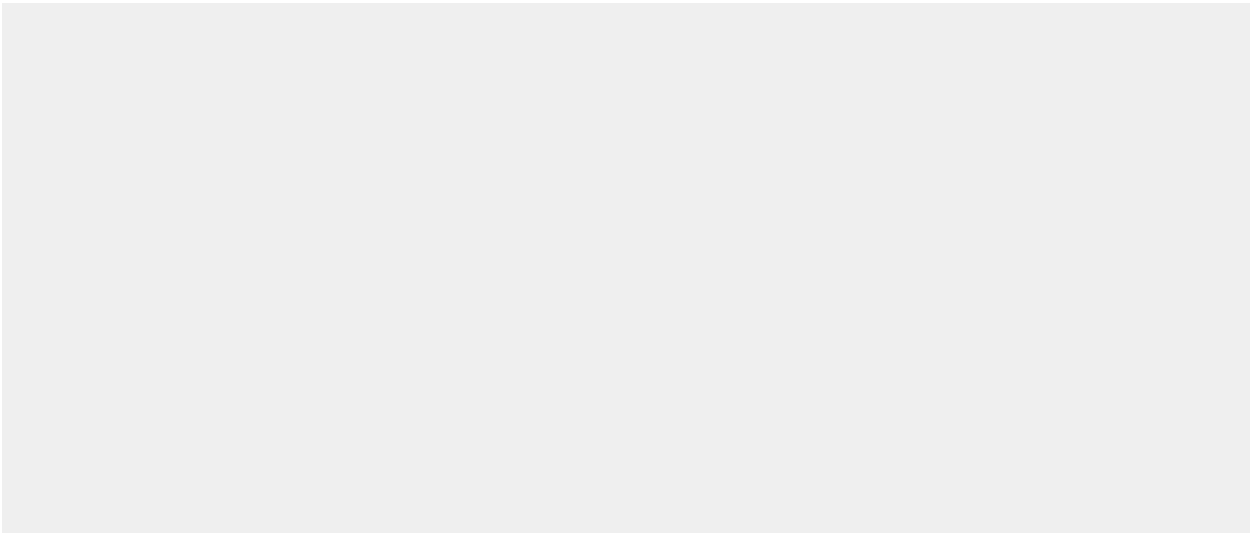

- Cleaning the parts and tools.
- Cleaning and wiping the common oil dirt.
- Cleaning and wiping small spill.
- Cleaning and wiping the users themselves .

PONGEL® L20 Universal Industrial Paper Wiper

- Features:**

 - 100% wood pulp, high water and oil absorbency, fast absorption.
 - Optimum wet strength, non-breakable performance in presence of water, no lint after wiping.
- Applications:**

 - Cleaning the parts and tools.
 - Wiping the utensils and table tops of lab, kitchen etc.
 - Wiping and maintaining the mechanical equipments.
 - Cleaning the transmission belts and rollers.
 - Cleaning and wiping the common oil dirt.
 - Cleaning and wiping the users themselves.

PONGEL® L25 Enhanced Industrial Paper Wiper

- Features:**

 - 100% wood pulp, high water and oil absorbency, fast absorption.
 - Better wet strength, non-breakable performance, lint free after wiping.
- Applications:**

 - Cleaning the parts and tools.
 - Wiping and maintaining the mechanical equipments.
 - Cleaning the transmission belts and rollers.
 - Cleaning and wiping the viscous oil dirt.
 - Cleaning and scrubbing leaked spill from oil compressor.
 - Cleaning and wiping the users themselves.

L25 Sample

PONGEL® L40 Tough Industrial Wiper

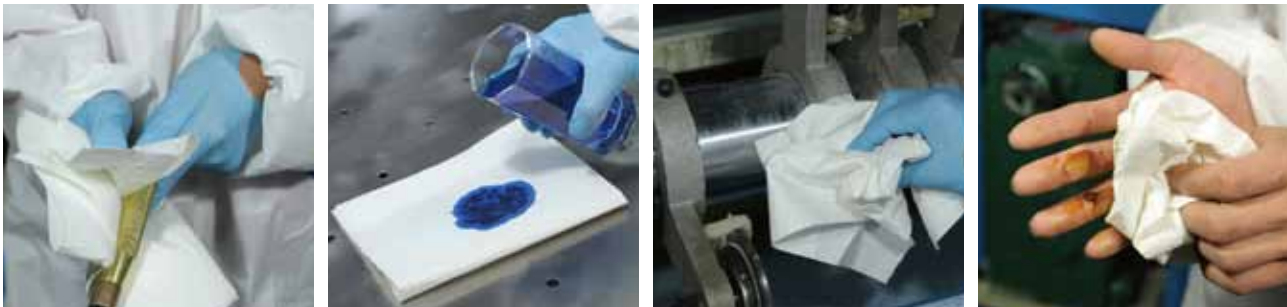

- Features:

 - Pure wood pulp through a special production process.
 - Ultra high dry and wet strength, cloth-like strength.
 - Low lint after wiping.
- Applications:

 - Cleaning the parts and tools.
 - Cleaning the users themselves.
 - Wiping and maintaining the mechanical equipments.
 - Absorbing the fluid splash and leakage.
 - Repairing and cleaning in the common industrial field.
 - Cleaning and wiping other workplace with heavy oil dirt.

PONGEL® L50 Dust-free Paper Wiper

- Features:

 - 100% long fiber wood pulp.
 - Soft texture, puffy nature, high toughness, good buffering performance.
 - High water absorbency, insoluble in water, dry and wet usage.
 - High oil absorbency, applicable to wiping the surface with much oil dirt and dust.
- Applications:

 - For living use: wet paper napkin , tablecloth , kitchen paper, foodstuff refreshing, damp proof packaging etc.
 - Beauty products: make-up cotton, beauty towel, facial mask, disposable bed sheet.
 - Sanitary products: sanitary towel, pad, paper diaper, toilet seat
 - For medical use: disposable bed sheet, pillow case etc.
 - For industrial use: cleaning, wiping, oil absorption and removal, precise instrument wiping and dedusting.

JEENOR Product Lineup

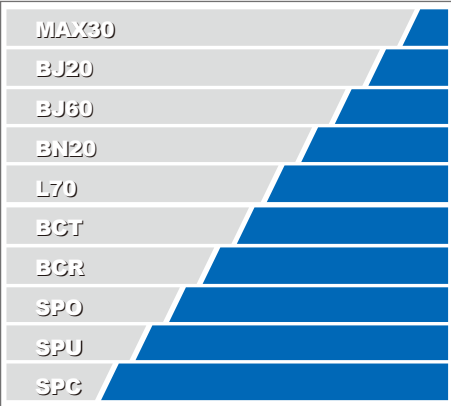

Common Wipers

Delicate Task Wipers

Special Wipers

Delicate Task Wiper

Specially designed for precision wiping of lab apparatus, special parts, precision instrument and optical lens, the product features low-lint, anti-static and has certain friction force. It can be used together with the solvent.

JEENOR® D31 Low Lint Industrial Wiper

- Features:**
- Ultra low lint, greatly reduced wiping time.
 - Fine paper that doesn't scrape the surface of the wiped objects.
 - Anti-static film that can effectively prevent the static and lint.
 - Good dry and wet strength.
 - 100% wood pulp in special process, pure texture, high water absorption.

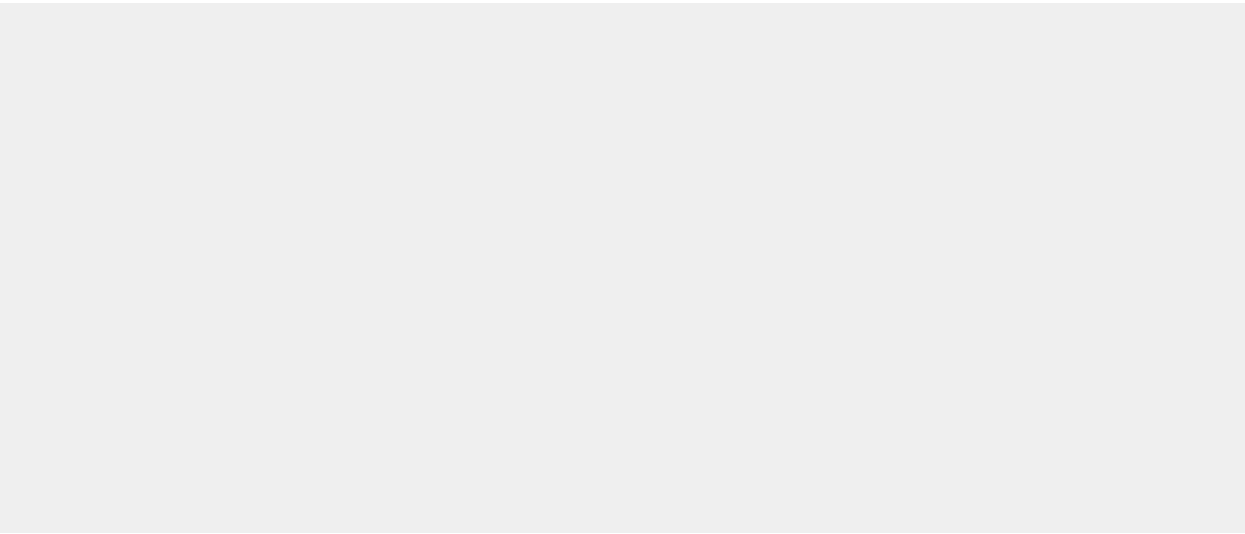

- Applications:**
- Wiping and cleaning the precise instruments and precise elements for scientific research and analysis.
 - Surface treatment with the solvent.
 - Cleaning the printing equipments.
 - Packaging the special components.

D31 Sample

JEENOR® K3 Lens Cleaning Wiper

- Features:**
- 100% wood pulp in special process.
 - No resin or glue additive, good solvent resistance.
 - High water absorption and retention, excellent wiping performance.
 - No poisonous substance generation
 - Lint-free, ultra soft, highly abrasion resistant.

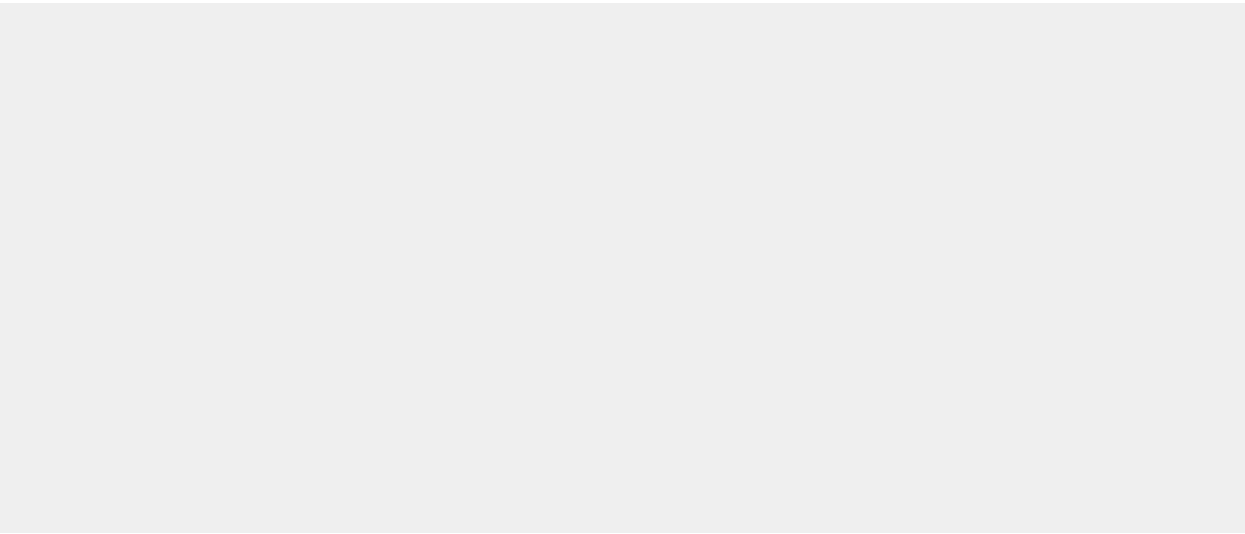

- Applications:**
- With unique irregular fabric, it is applicable to fine surface preparation of various irregular objects and widely to the maintenance of precision instruments.

CREW® CL4 Cleanroom Wiper For ISO Class 4

- Features:**

 - Compliance with ISO Class 4 (10) cleanroom requirements.
 - Straight cutting edge, clean, ultra low lint occurrence and ion release.
 - Acid and basic solvent resistance, soft surface, high water absorption.
 - Compliance with the foodstuff processing requirements, direct contact with foodstuff.
 - Unique Meltblown material, no adhesive added.
 - Firmness and high wet strength.
- Applications:**

 - Wiping in ISO Class 4 (10) cleanroom.
 - Maintaining the equipments in the cleanroom.
 - Controlling and absorbing the water and solvent in the cleanroom.
 - Surface treatment in special process with the solvent.
 - Packaging the special goods.

JEENOR® BCS Dust-free Micro fiber Cloth

- Features:**

 - 100% polyester fibre, soft enough to wipe the sensitive surface.
 - Low lint, no fibre falling in the friction process.
 - Good water absorption and cleaning efficiency.
 - Sufficient dry and wet strength.
 - Low ion release, few chemical reaction.
 - Optional edge seal types: ultrasonic, laser and cold cutting.
- Applications:**

 - Semiconductor, chip, microprocessor etc.
 - Semiconductor assembly line.
 - Disc drive and composite materials.
 - LCD PCB,optical,products.
 - Circuit board production line.
 - Precision instruments aviation industry medical equipments.
 - Cleanroom and production line.

Special Wiping

To meet the high function demands in the application where the common products can't reach the expected effect, special wiper products are developed.

BONGEL® MAX31 Heavy Duty Wiper

Features:

- High-tech material, surfactant contained design, quick absorption of oil dirt up to 8 times of its weight.
- Wiping the oil dirt, water and various solvents.
- Reusable nature.
- Firm texture and high wet strength.
- Combination with solvent allowed.

Applications:

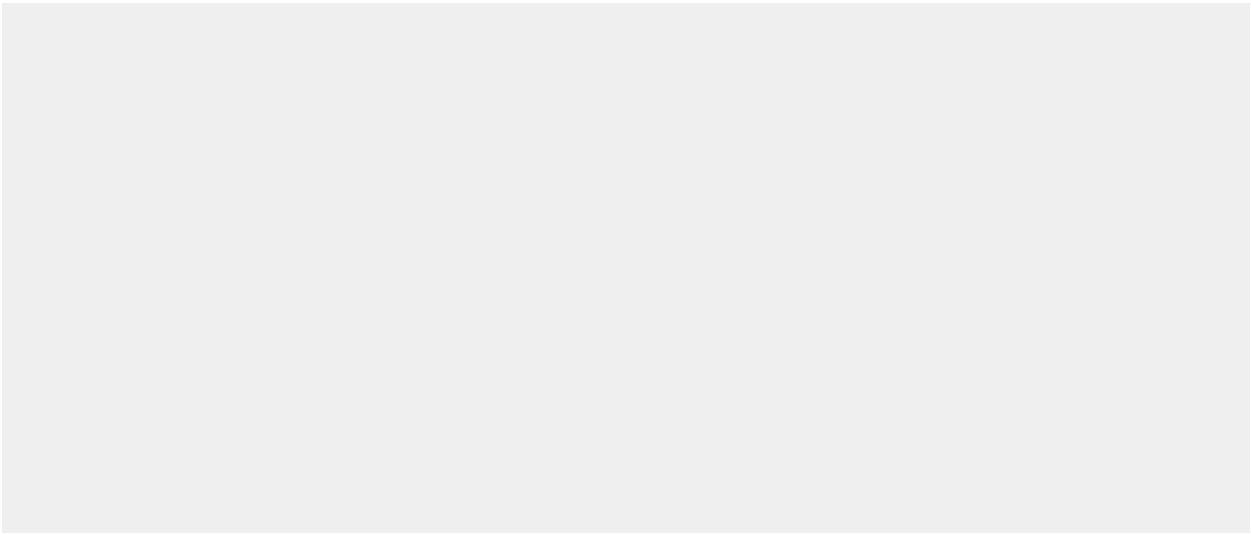

- Wiping the heavy oil dirt in the production environment.
- Surface treatment with solvent.
- Maintaining and caring machine tools and large equipments.
- Cleaning various leaked inks.
- Wiping the users themselves .
- Cleaning the screen boards.

68202	Fold	500×600mm	Yellow	1 sheet/1bag×500 bags/carton

Tack cloth is the best choice for cleaning the surface before the painting operation. It can effectively remove the dust and foreign matters on the surface to be painted, making the surface more smooth and lustrous after the painting. This cloth is widely used for cleaning in the electronics plant and precision manufacturing and for pretreatment during or before the painting operation in the automobile, motorcycle, aircraft and high-grade plastic pieces.

JEENOR® L70 Efficient Absorbent Cotton

- Features:**

 - 100% natural wood pulp fibre, water absorption up to 10-12 times of its weight.
 - Obvious decontaminating effect, no mouldiness after drying.
 - Naturally degradable, environment-friendly.
 - Washed by grabbing not wring, reusable after drying.
- Applications:**

 - Ideal beauty and skincare product due to its capability of thorough removal of the dirt in the skin pore.
 - Wiping and washing the kitchen ware, ceramics and glass products.
 - Cleaning up the dirt without scratch or damage to the vehicle body and window.
 - Wiping the surface of the machines for industrial, agricultural and mechanical purpose.
-

71165	Fold	600×500mm	Extra white	100 sheets/bag×8 bags/carton

JEENOR MT medical towel is of high strength and flexibility texture made by the water needle intertwisting method, in which thousands of high pressure water beams as thin as the needle are jettted to the composite fibers. These water beams twist the fibers into texture. After high temperature drying, the texture is made into roll. In the entire production process, no adhesion substances, chemicals or adhesives are used. Therefore, our hand towel is chemical-free and soft. It will not cause irritability or generate lint. It is sterilized and disinfected at high temperature.

BONGEL® MP60 Medical Wrapper

Features:

- Inhibiting the bacterial reproduction.
- Safe and hygeian due to disposable use.
- Meet the medical product requirements.

Applications:

- Disposable package for band aid, pain relief band, tablet, disposable injector, medical gloves and other medical instruments and products.
